Law Quiz Avatar Bot

Law Quiz project is based in the Metaverse and features a virtual AI avatar designed to act like a law professor. This avatar can explain legal cases to users based on the information we have provided. If a user asks about a particular case, the avatar will provide a detailed explanation and recommend taking a related quiz. We have also created a quiz game within the project. By pressing the quiz button, users can access the quiz, and their performance will be scored according to their output.

Features

1. Interactive Legal Guidance
2. Natural Language Processing
3. Contextual Quiz Suggestions
4. Personalized Learning Experience
5. Adaptive Learning Paths

Benefits/Impact

1. avatar: The AI avatar acts as a law professor, providing detailed explanations of legal cases.
2. Quiz: Users can access quizzes through a simple button press and Users receive scores based on their quiz performance, providing immediate feedback.
