

# Quiz Analytics in Metaverse

We've created an exciting quiz game that aims to make learning fun and interactive for students.

## Here's what sets our project apart:

- **Multi-Participant Capability:** Up to 100 students can join the quiz simultaneously.
- **Real-Time Scoreboard:** Students can see their scores instantly, adding a competitive and motivating edge.
- **User-Friendly Interface:** The game is easy to navigate, ensuring all students can take part effortlessly.

## Why Students Should Use This Project:

- **Interactive Learning:** Our quiz game transforms education into an interactive experience, making studying more enjoyable.
- **Healthy Competition:** Students can compete with their peers in real-time, fostering a positive spirit of competition and motivation.

## How to Use This Project in Real Life:

- **In-Class Assessments:** Teachers can use the quiz game for engaging in-class assessments, turning traditional tests into interactive activities.
- **Study Groups:** Students can use the quiz game collaboratively in study groups to reinforce their knowledge and enhance teamwork.
